

Length of Service

Individual needs and choice determine the level of service. All units of our organization collaborate to insure that each individual's recovery is supported to the fullest extent possible. Each service area has a "non decline" policy, which means that individuals can easily move from one service area to another.

Staffing

A multi-disciplinary staffing pattern promotes a holistic approach to treatment.

Confidentiality

All personal information about recipients is considered privileged and confidential. We abide by all federal HIPAA regulations.

Obtaining services

Buffalo Psychiatric Center's Inpatient Service accepts referrals from the psychiatric units at the general hospitals in our service area. Individuals discharged from our inpatient services within the past year who require an additional brief hospitalization may be directly re-admitted.

The Inpatient Admissions Office may be contacted at: 816-2172

Services at our other locations may be requested by contacting the specific program.

A Facility of the
Office of Mental Health

Buffalo Psychiatric Center

Our vision:

- create opportunities for personal growth, choice, and recovery
- foster hope and respect
- provide safe environments
- promote excellence
- encourage partnerships among recipients, families, and providers.
